PERSONAL PROJECTS

Personal Portfolio Website – GitHub Repository ([link](#))

Developed a responsive personal portfolio website and GitHub repository using HTML, CSS, and JavaScript to showcase my profile, technical skills, and projects.

- **System Dashboard:** Built a management system with a navigation sidebar, live statistics dashboard, CRUD operations table, category filters, search functionality, bar chart reports, and CSV export support using Java, HTML, and CSS.
- **Appointment Web App:** Created an interactive appointment scheduling web application with a monthly calendar, daily appointment management, appointment type support, and modal forms using JavaScript, HTML, and CSS.
- **Scientific Calculator:** Developed a calculator with Basic and Scientific modes, including trigonometric functions, logarithms, DEG/RAD modes, clickable history, and keyboard support using JavaScript, HTML, and CSS.
